SUMMARY

Senior UX designer and project manager at Agile Defense. I manage Agile Defense University, a company-wide AI-native learning program for around 1,500 employees, and lead delivery for Experience Studio, the 4-person design team that builds its training courses. Before that, I was lead UX/UI designer on a site-wide redesign at the University of North Georgia. Certified ScrumMaster and SAFe for Teams.

EXPERIENCE

Senior UX Designer

Nov 2021–present

Agile Defense (formerly Intellibridge) · *Federal and commercial digital services firm. Promoted from UX Designer to Senior UX Designer.*

- Project manager for Agile Defense University (2026–present): asked by leadership to run the project behind its five OKRs, covering career ladders, manager readiness, certification pathways, an organization-wide content engine and new-hire onboarding.
- Coordinate HR, Operations, Compliance and Communities of Practice in Jira.
- Launched the ADU learning hub on SharePoint, added it to new-hire orientation, and rolled out a company-wide Career Baseline Assessment.
- Draft storyboards, validate scripts against employee reactions, and revise before production. The rest of the program now follows this process.
- Project manager for Experience Studio, a 4-person design team (2024–present): track active initiatives and report status to leadership. The team produced the AI Foundations course, Teammate 101 and Skill 101 walkthroughs, policy and privacy training, and white papers.

- Co-led the Labs project management office for 6 months after the merger: triaged incoming work, assigned tasks to designers with open capacity, and managed delivery.
- Built Fast Play, a template-and-AI-agent workshop system built on the company's methods wiki, so any employee can run a workshop without deep facilitation experience.
- Contributed to four concept-prototype dashboards for federal clients (defense readiness, law enforcement HR, municipal infrastructure, compliance tracking) in ten-day Discovery sprints with proxy users, used to win and expand federal engagements.
- UX designer on USDA BPA projects and the 2022 National Archives 1950 Census release site.

UX Content Designer

2022

Novant Health (via Accrue Partners) · *Healthcare system website redesign. Part-time contract alongside Agile Defense.*

- Built an average of 50 Figma page prototypes a week for the CMS migration team, at an average of 10 minutes per page using auto layout.
- Helped build a drag-and-drop design system that made page building faster than the manual builds it replaced.

Web Designer

Sep 2016–Nov 2021

University of North Georgia · *Public university*

- Led UX/UI design on a research-driven redesign of a 5,000+ page site that restructured content and navigation for prospective students.
- Consolidated 20+ site menus into one structure using Google Analytics patterns, deciding what to keep, merge or cut.
- Designed the two-factor authentication onboarding page that guided 20,000+ students, faculty and staff through the rollout, with no spike in support tickets.

SKILLS

UX research and usability testing • Workshop design and facilitation • Information architecture • Rapid prototyping • Project management • OKR-driven delivery • Agile and Scrum • Figma and Mural • Jira and Confluence • Claude and ChatGPT

EDUCATION

Bachelor of Arts, English Literature

University of North Georgia
