SUMMARY

Senior UX designer and project manager with one working rule: make the problem simple, then solve the simple problem. At Agile Defense I take complex topics and make them easy for anyone to understand, most recently in AI Foundations, a course now required for every employee. I helped design and run the 10-day Discovery process that helps win federal contracts, and I manage Agile Defense University, a company-wide learning program for around 1,500 employees. When work stalls, I find the blocker and get the right people talking. Certified ScrumMaster and SAFe for Teams.

EXPERIENCE

Senior UX Designer · Project Manager, Agile Defense University Nov 2021–present

Agile Defense (formerly Intellibridge) · *Federal and commercial digital services firm. Project manager for Agile Defense University since 2026 and for Experience Studio since 2024; promoted from UX Designer to Senior UX Designer.*

- Helped storyboard, script and build AI Foundations, released to the whole company: a plain-language course on where AI came from, what it is, how to use it well, and what can and can't go into AI systems at each clearance and classification level. It is now required before employees can use the company's internal AI tools.
- Helped design and run a 10-day Discovery process that puts interactive prototypes in front of federal customers before competitors have written a proposal; these sprints, including four concept dashboards I contributed to, have helped win federal contracts.

- Created Fast Play from the company's methods wiki: templated workshop plays, now part of Discovery, that let me set up a discovery workshop in minutes, even before every stakeholder is known.
- Asked by leadership to run Agile Defense University against five OKRs, coordinating HR, Operations, Compliance and Communities of Practice; launched its learning hub on SharePoint and added it to new-hire orientation.
- Project manager for Experience Studio, a 4-person design team: track active initiatives and report status to leadership.
- Co-led the Labs project management office for 6 months after the merger: triaged incoming work, assigned tasks to designers with open capacity, and managed delivery.
- Start every project with a kickoff that includes every involved party, so the group agrees on the facts and there is no confusion or blame later.

UX Content Designer

2022

Novant Health (via Accrue Partners) · *Healthcare system website redesign. Part-time contract alongside Agile Defense.*

- Helped build a drag-and-drop design system that made page building faster than the manual builds it replaced.

Web Designer

Sep 2016–Nov 2021

University of North Georgia · *Public university*

- Led UX/UI design on a research-driven redesign of a 5,000+ page site, consolidating 20+ site menus into one structure.

SKILLS

UX research and usability testing • Workshop design and facilitation • Information architecture • Rapid prototyping • Project management • OKR-driven delivery • Agile and Scrum • Figma and Mural • Jira and Confluence • Claude and ChatGPT

EDUCATION

Bachelor of Arts, English Literature
